About me

As a creative and skilled developer, I have passion for building optimal applications with accurate output. With a strong foundation in python programing language. As a person who is in love with learning, I am committed to stay up-to-date with latest technologies and methods. in my free time, I enjoy exploring new coding concepts or checking out and contributing in open-source projects. I have experience working on few Voluntary projects such as a telegram news channel and a little teaching experience in university as Assistant Professor. I am excited to bring my skills and knowledge to a new opportunities where I can continue to learn and grow as a developer and help to build innovative and high quality applications.
